

Salt Lake City International Airport

## Current Construction

## Future Construction

## Future Transit Projects

### ● New Intersection/ Future Interchange

- Initial construction access points are signalized intersections
- Future construction access points will be interchanges

## SALT LAKE COUNTY

- Construction will begin in Spring 2010
- In initial construction, two lanes will be built in each direction with signalized intersections where future interchanges will be located
- The conversion to a full freeway will be a part of future phases

## UTAH COUNTY

- In initial construction, two lanes will be built in each direction, with signalized at-grade intersections where future interchanges will be located
- The full 2100 North roadway will be built in phases as growth and need dictate and as funding becomes available
- New bridges will span the Jordan River and a separate set of bridges just west of the river will accommodate a community crossing
